

Stellar Shield

Data Safety Software

Stellar Shield

STELLAR SHIELD is pre-crash data protection software that provides data restoration after any form of logical data loss. Once installed, SHIELD takes a snapshot of critical system attributes and information and stores it in a safe part of your hard disk. In the event of any data loss, SHIELD searches the secure backup and helps recover/restore all the data immediately.

Stellar Shield creates up to 6 different Backup Images (based on a user-specified File Hierarchy Number) of all important system information needed to reconstruct the System Drive in case of a drive failure. Stellar Shield is the perfect software for data restoration in the event of a Drive failure, Disk crash or File deletion. It is easy to install and does not affect system performance in any way. The software is menu driven, very user friendly and requires no technical skill to operate.

Key Features:

- Extremely simple to install and use with a friendly Graphical User Interface (GUI)
- Efficient software engine protects against system performance degradation
- Hierarchical model enables recovery of data lost days before
- Convenient scheduling options
- Conversion utility to convert Short Names (DOS truncated) to Long File Names
- Supports all FAT and NTFS File Systems
- Supports Assigned Drive Letters and Dynamic Drives
- Supports IDE/EIDE/ATA/SCSI Interfaces.
- Password protected to ensure secure usage

Stellar Shield product range supports a wide range of File System and Operating Systems

- Stellar Shield Desktop Edition Windows (FAT16, FAT32 NTFS, NTFS5 file system)
- Stellar Shield Server Edition Windows (FAT16, FAT32, NTFS, NTFS5 file system)
- Stellar Shield Server Edition Novell Netware (Netware file system)

Systems Requirement:

- Any IBM PC compatible computer
- Windows 9x/ME/2000/XP
- Minimum 64MB (Recommended 128 MB) of RAM
- IDE/EIDE/ATA/SATA/SCSI Type ; 100 MB of free space

Software License Options: Single User License

Software Interface Languages: English
