

Stellar Phoenix Mailbox (Professional) Data Recovery Software

Stellar Phoenix Mailbox Professional

Stellar Phoenix Mailbox Professional offers repair and restoration options for Mails from damaged or corrupted Microsoft Outlook files. Microsoft Outlook stores email messages, contacts, notes and folders on the local drive as a .pst file. This Outlook file recovery software scans the damaged .pst file and extracts and saves information in a new usable .pst file, thus enabling PST File Recovery. In addition, Phoenix allows you to recover accidentally deleted messages that have been removed even from the "Deleted Items" folder in Outlook.

Key Features:

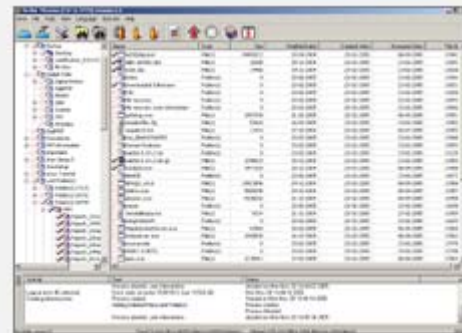

- Provides PST Recovery from folders, calendars, contacts, tasks, notes
- Repairs even the password protected files
- Restores formatting from RTF and HTML messages
- Recovers from encrypted files
- Support to repair .pst files with the 2GB size limit problem.
- Recovers deleted email attachments.
- Recovered messages may be saved in the .pst file format on any (including network) disks visible by the host operating system

Outlook Express Version Supported:

Microsoft Outlook 98, Outlook 2000 and Outlook 2002

Systems Requirement:

- Pentium-class processor
- Windows 9X/ME/NT/2000/XP
- 64 MB RAM (128 MB recommended)
- 10Mb for the software installation
- Disk space - enough space to create a repair copy of the file
