Stellar Reporter & Auditor for Exchange Server

Installation guide for version 1.0
1. General Information

1.1. Overview

**Stellar Reporter & Auditor for Exchange Server** is an analysis and reporting solution for **Microsoft Exchange Server**, which provides you with in-depth insight about your organization’s Exchange server and assists you to generate reports for audit and reporting requirements.

The software provides 142 different reports for Exchange Server’s Mailboxes, Public Folders, Usage, Security and Server configuration. By having a look at these reports an IT administrator can easily judge what is wrong and what needs to done.

**Microsoft Exchange Server** is by far the most popular communication, collaboration and email messaging application used today. It becomes a necessity to have an Exchange reporting tool that will equip an Exchange Administrator with precise, granular, comprehensive and actionable data on all aspects of the MS Exchange Server.

**Stellar Reporter & Auditor for Exchange Server** is an encapsulation of the ‘investigation and surveillance’. It fetches, audits, tracks and analyzes every critical data in your Exchange Server & Active Directory network without a hitch. The software offers information about mail traffic statistics & analysis, mailbox sizes, OWA usage, message content analysis, public folders, usage, security, growth rates, server usage
pattern, server configuration, mailbox permission changes and many more thus it also assists in resource optimization and spam fighting.

Key Features:

- Automates the process of auditing and reporting for your MS Exchange server.
- Web based solution that can be used from anywhere, even from Smartphones.
- Restricted access to application through secured logins with two types of users (administrator and operator).
- Does not require the knowledge of Exchange Management Shell.
- Generates notifications as alerts, warnings and errors (categorization is based on severity and can be customized).
- Option to predefine the recipients of the Alerts by specifying the email addresses.
- Supports Multiple MS Exchange Servers on the same network.

Reporting and Auditing -

- **Stellar Reporter & Auditor for Exchange Server** provides 142 reports on every aspect of the Microsoft Exchange Server environment.
- Provides you the option to schedule the scanning and reporting process.
- Frequently viewed reports can be added to favorite section for easy access.
- Option to Export the reports to CSV, PDF, XLXS and HTML formats.
- Reports can be viewed for selected date or period.
- Option to predefine the recipients of the Reports by specifying the email addresses.
• Determine the level of reporting using filters.
• "Customize Columns" option allows you to include or exclude report columns.
• Graphs and Charts that highlight the important aspects for a majority of reports.
• Facilitates Printing of reports.

Exchange Reports are grouped under the following categories:

1. Report
   o Mailbox Reports - Reports to track mailboxes on Exchange server. Includes reports for list of mailboxes, current mailbox size, mailbox growth, mailbox size restrictions, status, mail content by keywords, etc.
   o OWA & ActiveSync Reports - Keep track of activities on Outlook Web Access by filtering data by Users, Browser and even by Client IP address and ActiveSync traffic in your organization.
   o Email Traffic Reports - Exchange Traffic analysis by tracking the traffic to each mailbox with respect to the sender as well as recipient, and also by the count of messages and size.
   o Storage reports - Reports related to the size, size growth and size restrictions of mailbox stores and public stores.
   o Distribution Lists Reports - Keep track of every user’s activity on a Distribution List.
2. **Auditor**

- Helps to keep an eye on any change that occurs in your Exchange Server environment.
- Ensures a healthy and glitch-free Exchange Environment.
- Alerts can be configured to receive notifications about changes.
1.2. System Requirements

1. Hardware Requirements:
   - **Processor** - Pentium Class
   - **Disk Space** -
     - For installation - Minimum 500 MB of free space.
     - For running the application - 10 to 20 GB of free space (The storage space requirements might vary depending upon your organization size, mailbox size, traffic frequency, outlook web access logins, log file size of IIS and message tracking logs)
   
   *Note: It is recommended to install the software where you have maximum available space in the disk.*

   - **RAM** - 2 GB Minimum (4 GB Recommended).

2. Software Requirements:
   - **Supported Platforms**
     - Windows 7
     - Windows 8
     - Windows 10
     - Windows Server 2000
     - Windows Server 2008
     - Windows Server 2012.
   
   - **Supported Exchange Servers**
     - Exchange Server 2007
- Exchange Server 2010
- Exchange Server 2013

- **Supported Browsers**
  - Chrome (recommended)
  - Internet Explorer
  - Firefox.

- **MS Outlook** 2007 or above.

- **.NET framework** 4.0 or above.

- **MS Excel** should be installed to view downloaded .xlsx files.

- Host machine and exchange server must be on the same subnet. A subnet is a part of a larger network such as the Internet.
