

Step 1

Step 2

The screenshot shows the Windows Control Panel window. The title bar is labeled 'Control Panel'. The address bar shows 'Control Panel'. The main content area is titled 'Adjust your computer's settings'. It lists several settings categories, each with a brief description and a link to the settings page:

- System and Security**: Review your computer's status. Have Windows update your files with file history. Backup and Restore (Windows 7).
- Network and Internet**: View network status and troubleshoot.
- Hardware and Sound**: View devices and printers. Add a device.
- Programs**: Uninstall a program. Set programs.
- User Accounts**: Change account type.
- Appearance and Personalization**: Change the look of Windows.
- Clock and Region**: Change date, time, or number formats.
- Ease of Access**: Let Windows suggest settings. Optimize visual display.

Step 3

The screenshot shows the Windows Control Panel with the 'Programs and Features' window open. The 'Uninstall or change a program' window is overlaid on top, displaying a list of installed programs. The 'Uninstall or change a program' window is showing a list of programs and a 'Yes' button.
